AVAILABILITY: Immediate | Modality: Remote | Nearshore | On-site

PROFESSIONAL PROFILE

Software Engineer with over 5 years of experience developing enterprise software and scalable architectures. Expert in the Java ecosystem, specializing in microservices with Spring Boot and RESTful API design. Passionate about solving complex technical challenges through continuous learning and collaborative teamwork. Proven ability to deliver value in agile environments while fostering knowledge sharing and maintaining strong client-provider relationships grounded in commitment and transparency.

TECHNICAL SKILLS

Backend: Java (Expert), Spring Boot (Microservices), Spring MVC, Spring Security, Spring Data JPA, RESTful APIs, Hibernate/JPA, JUnit 5, Mockito

Languages: Python 3.12, PHP, JavaScript (ES6+), SQL, HTML/CSS

Databases: MySQL, PostgreSQL, Oracle (Fundamentals), Data Modeling and Normalization

Cloud & DevOps: Docker, Docker Compose, AWS (EC2, S3), Basic CI/CD

Tools: Git/GitHub, IntelliJ IDEA, Eclipse, VS Code, Postman, Swagger/OpenAPI, Maven, Gradle

Methodologies: Agile, Scrum, Collaborative Development

PERSONAL PROJECTS (GITHUB)

Repository: <https://github.com/raulrodriguezmesia-blip>

1. Java Junior Portfolio (2025) – [GitHub]

<https://github.com/raulrodriguezmesia-bliip/java-junior-portfolio>

- Built a full-featured console CRUD application with multi-format persistence (JSON, CSV, TXT)
- Integrated external REST API (JSONPlaceholder) using Java 11 HttpClient
- Achieved 80% test coverage with 19 JUnit 5 unit tests, employing mocking and isolation techniques
- Applied layered architecture (model/service/repository/util) with professional logging and robust exception handling
- Stack: Java 11, Maven, Jackson, JUnit 5, Git, VS Code

2. Municipality System (Highlighted Project) – Employee Management

- Designed a secure employee management system with JWT/OAuth 2.0 authentication
- Implemented backup and disaster recovery mechanisms to ensure service continuity
- Applied password encryption using SHA-256 and BCrypt following industry best practices
- Produced 8 active commits with comprehensive technical documentation
- Technologies: Java, JDBC, MySQL, Eclipse IDE

3. Spring Boot REST API (Microservices)

- Developed scalable RESTful microservices using Spring Boot
- Created REST controllers with input validation and centralized exception handling
- Managed dependencies via Maven and documented APIs with Swagger/OpenAPI
- Technologies: Java, Spring Boot, Maven, Swagger, RESTful

4. Ferretería JPA-Hibernate – Inventory Management Web App

- Engineered a web-based inventory system with JPA-Hibernate persistence
- Optimized MySQL queries for high-performance data retrieval
- Technologies: Java, JPA, Hibernate, MySQL

PROFESSIONAL EXPERIENCE

AREQUIPA EXPRESO MARVISUR EIRL | PERU

Operational and Logistics Support (Technical Focus) | 2020 – 2025

- Maintained and enhanced the MARVICOM enterprise system (Java/MySQL), resolving critical incidents through collaborative troubleshooting
- Analyzed logistical workflows and managed data via customs and financial systems
- Improved operational efficiency by applying computational logic and continuous improvement practices
- Provided technical support to over 100 internal users within multidisciplinary agile teams
- Directly aligned technical solutions with business objectives to deliver measurable value

CJ CONEXIONES C.A. (MOVISTAR AGENT) | VENEZUELA

IT Support Assistant | 2016

- Delivered hardware technical support and administered sales systems
- Configured and maintained network equipment with a client-centric approach

POLICE COORDINATION CENTER No. 03 POLIGUARICO | VENEZUELA

Software Developer | 2015

- Developed an inventory control system using Java and MySQL, delivering effective solutions
- Automated manual records, reducing processing time by 30%
- Optimized SQL queries for large-scale data handling
- Collaborated closely with team members, sharing knowledge and best practices

INFOCENTRO (ADOLFO ANTONIO MACHADO LIBRARY) | VENEZUELA

Web Developer | 2014

- Created web modules using PHP, JavaScript, and MySQL to digitize physical archives

- Contributed innovative ideas to streamline management processes

ACADEMIC EDUCATION

Instituto Universitario de Tecnología de los Llanos (IUTLL) | Venezuela

Software Engineer | 2017

COMPLEMENTARY TRAINING

- Specialization in Java Spring Boot: Microservices and RESTful APIs
- Technical Update: Python 3.12 (56 hours)
- Advanced Java Programming (56 hours)
- Organizer, 8th National Free Software Congress (CNSL) – Promoting technical community growth
- Socio-Technological Project | Infocentro (250 hours) – Demonstrated social commitment

CERTIFICATIONS (IN PROGRESS)

- Oracle Certified Associate, Java SE
- AWS Certified Cloud Practitioner

LANGUAGES

- Spanish: Native
- English: Intermediate (Technical proficiency)

OTHER

- Open to remote work, aligned with environmental commitment to reduce commuting
- Experienced in nearshore arrangements (Peru–Spain)
- Dedicated to fostering diversity and inclusion in the workplace
